Gerber - Gerber MES (Multi-Format Engraving System) allows you to automatically create, print, and load engraving projects for letterpress, flexography, screen, offset, lithographic, and some specialty printing processes. Shop at Lectra, for a wide variety of high quality premium products. The price of a color management solution generally falls into the millions of dollars, and includes an integrated color management module, hardware and software. Color management software from "Lectra" is intended to help you convert and manage the color of your materials, labels, templates, artwork, etc., between different output devices, including from computer monitors to printers. Lectra currently is licensed to more than 2,000 retailers worldwide, including on-line retailers, printers, designers and finishing specialists, and is used with computer and laser printers, as well as inkjet, electrophotographic and offset lithographic printers. Over the course of a typical project, this software may require a number of interfaces, and may change file formats to comply with the new requirements.. The Diamino ColorManager Automated Office is an advanced, integrated solution that allows you to manage all aspects of a print project, from beginning to end. Lectra Diamino Systems are an innovative company providing both on-premise and cloud-based solutions to the commercial printing, finishing and converting industries. The initial volume was 1,000 machines, primarily to the automotive industry. Lectra was the first company to sell a unit with computer-controlled engraving. Kaleido Kustom's functions that were introduced with version 5.0 are preview-enabled, preview-automatic, fill-in-darkening-tools, template-editor, folder-library, add-border-tools, re-order-tools, add-line-tools, editing-tools, color-stabilization tools, border-tools, filter-tools, power-tools, preview-tools, calculator, layer-tools, Layer-studio, Bevel-tools, standard-tools, pattern-tools, grid-tools, dials-tools, follow-me-tools, 3D tools, snap-to-guides, gradients, and all-in-one tools. Also included are standard-media such as: Pencil, Grayscale, RGB, CMYK, LAB, Grey, BlueGrey, Inverted, Black & White, Patterns
