KEYMACRO is a feature that allows you to include or exclude some fields from the conversion process and data copy. For each field, you can define a value of `0` (for excluding it from data copy) or `1` (for including it). Then use the key macro in the wizard and in command line mode to specify

value of the key macros.

Import/Export Wizard: All advanced functions of FoxPro2MySQL Pro Serial Key are presented in the wizard. There is an option to export the whole database or any specific table of the database to MySQL database. Moreover, we provide a feature that allows you to import data in the same way. **Import Wizard:** Here you have an opportunity to select the database into which you want to import data from a MS Visual FoxPro database. Then you

can choose whether to import the whole database or a table in it. Additionally, you can select a table to copy from MS Visual FoxPro.

Export Wizard: Here you have an opportunity to select the database in which you want to export data from a MySQL database. Then you can choose whether to export the whole database or a table in it. In addition, you can select a table from the database in which you want to export data.
