Once you have gathered your sources, synthesize the information to develop a cohesive argument or analysis.

- **Identify Themes:** Look for common themes, patterns, or discrepancies in your sources.
- **Integrate Evidence:** Combine information from various sources to support your thesis and build a well-rounded argument.

7. Revise and Refine Your Research

As you draft your assignment, revisit your research to ensure that it aligns with your arguments and supports your thesis effectively.

- **Review for Gaps:** Check if there are any gaps in your research and address them with additional sources if needed.
- **Ensure Proper Citation:** Verify that all sources are properly cited according to your assignment's required citation style.
